QUICK AND EASY STRIP QUILT USING VICTORIAN TEXTILES PANEL RAINBOW KIT

1. Separate your rainbow into colours.
2. Lay your panel on a large surface such as the floor or a bed.
3. Choose four strips for your first border and lay them around your panel.
4. Lay the rest of the strips around the panel. Your matching rainbow has been especially designed to complement your panel with a mix of light, dark and contrasting fabrics.
Mix them up and move them around until you are happy with the placement.
5. Sew the first border around the panel. Then sew the placed rainbows together, end to end in one long strip.
6. Sew them around your quilt until you are happy with the size or all strips are used.
   - Tips
     o You may want to join your strips on an angle for a more interesting look
     o Don't be afraid to shorten strips to different lengths
     o As all panels differ in shape and size, the completed quilt size is up to you!
